

Group Presentation Rubric (100 points)

General Instructions: The presentation will be approximately 10 – 15 minutes. Below are the different components that I will be looking for. You have the freedom to present the information in whatever order makes sense for your group. I would suggest beginning with an overall introduction, introduce the main topic area, provide general procedures and then each individual will highlight their portion with any specifics that have not already been covered. ***Think of this as though you are pitching your proposed research project to a group of investors to get funding to run the project.***

Parts	Criteria	Points
<i>Introduction</i> <i>From: Project Proposal</i>	<ul style="list-style-type: none"> Establish the topic and why it should be researched Discuss prior research relevant to existing study Establishes rationale for existing project (what is missing from past work, or what are we building on?) Clearly state the Research Question or Problem (group & individual) 	15 Points
<i>Design & Methods</i> <i>From: Design & Measures</i>	<ul style="list-style-type: none"> Give relevant information on planned sampling procedures Specific definition of the study design and the procedures for each study visit (i.e., what does the participant do) Provide operational definitions for all constructs used in study and which measures will be used to define them 	30 Points
<i>Data Analytic Plan</i> <i>From: Data analytic plan</i>	<ul style="list-style-type: none"> Show your visualization of your proposed model Highlight your data exclusion criteria Indicate the specific data analytic technique Walk through the steps taken to analyze the data using your proposed statistical methodology Be sure to specify which analyses are confirmatory vs. exploratory 	30 Points
<i>Discussion</i>	<ul style="list-style-type: none"> Reflect on generalizability of your findings Identify how sampling procedures may limit the conclusions Indicate what next research could investigate 	10 Points
<i>Style/Other</i>	<ul style="list-style-type: none"> All sections above are included and organized clearly APA format is used properly (citations, tables, etc.) Presenters do not over-rely on text Presenters attempt to use a variety of media where possible to minimize viewer fatigue of having to read slides over and over Responds to questions appropriately There is an overall cohesion among all research questions 	15 Points
